Table of Contents

Session 1—Master Planning of Resources

The Manufacturing Planning and Control System.....	1-9
Manufacturing and Service Industry Objectives.....	1-9
Role of Manufacturing Planning and Control	1-11
Manufacturing Planning Hierarchy.....	1-15
Role of Planning Software in MPC.....	1-21
Factors Affecting MPR System Design.....	1-23
Master Planning of Resources	1-29
Direction Setting: Strategic and Business Planning.....	1-29
Demand Management	1-33
Sales and Operations Planning	1-41
Master Scheduling	1-45
Distribution Planning.....	1-47

Session 2—Forecasting Demand

Demand Forecasting Concepts.....	2-7
Forecasting Framework	2-7
Managing the Forecast.....	2-17
Forecasting Techniques.....	2-29
Factors Affecting the Forecast	2-29
Qualitative Forecasting Techniques.....	2-39
Quantitative Intrinsic Techniques	2-45
Quantitative Causal Techniques.....	2-59
Collaborative Planning, Forecasting, and Replenishment	2-63

Session 3—Demand Management and Customer Service

Evaluating Forecast Performance	3-7
Guidelines for Evaluating Forecasts.....	3-7
Outcomes of Forecast Evaluation	3-9
Determining Forecast Error	3-9
Standard Deviation	3-21
Customer Relationship and Order Management	3-25
Customer Relationship Management (CRM).....	3-25
Customer Order Management.....	3-33
Effective Customer and Internal Communication	3-39
Order Delivery Performance Measurement.....	3-41
Customer Service and Safety Stock	3-49
Purpose of Safety Stock.....	3-49
Customer Service Levels.....	3-51
Calculation of Safety Stock.....	3-53
Customer Service Policy and Performance Targets.....	3-61

Session 4—Distribution Planning

Distribution Network Planning	4-7
Distribution Channel Design Considerations	4-7
Network Configuration	4-17
Transportation and Distribution Center Site Decisions	4-29
Distribution Replenishment Planning.....	4-37
Product Forecasting.....	4-37
Replenishment Planning Approaches.....	4-43
Replenishment Planning Linkages to S&OP and Master Scheduling.....	4-61
Measuring Performance.....	4-69
Distribution System Performance Measures	4-71

Session 5—Sales and Operations Planning

S&OP Introduction	5-7
Major Attributes	5-7
S&OP Relationships	5-9
S&OP Fundamentals	5-11
Management Considerations.	5-13
Guiding the Business	5-13
Roles and Responsibilities.....	5-19
Key Planning Factors.....	5-21
The S&OP Process	5-25
S&OP Process Outcomes	5-25
Monthly Executive S&OP Process Steps.....	5-27
Developing and Validating the Production Plan	5-31
Production Planning Methods	5-31
Make-to-Stock S&OP Plan.....	5-33
Developing a Make-to-Stock S&OP Grid	5-35
Financial Evaluation of Level and Chase	5-41
Developing a Make-to-Order S&OP Grid....	5-47
Resource Planning.....	5-57

Session 6—S&OP and Master Scheduling

Introduction	6-7
Transition from Sales and Operations Planning	6-7
Master Scheduling Objectives.....	6-7
Role in Manufacturing Planning and Control	6-9
Maintaining the Master Schedule.....	6-11
Major Influences on Master Scheduling	6-13
Business Environment.....	6-13
Master Scheduling Process	6-19
Introduction	6-19
Maintaining the Stability of MPS.....	6-39

Session 7—Managing the Master Schedule

Management Considerations.....	7-7
The Balancing Act.....	7-7
The Role of the Master Scheduler.....	7-9
The Role of the Senior Executive.....	7-11
Planning and Coordinating Changes.....	7-13
Maintaining the Integrity of the Master Schedule.....	7-27
Assemble-to-Order Master Scheduling	7-31
Bills of Material.....	7-31
Planning Bills of Material	7-33
Two-Level Master Scheduling Demonstration and Problems.....	7-43
Reviewing Capacity Requirements.	7-55
Rough-Cut Capacity planning	7-55
RCCP Process	7-57
Possible Solutions	7-63
Overload and Underload	7-65
Revised MPS and RCCP Report.....	7-67
Advanced Planning and Scheduling (APS).....	7-69
Approach to Capacity Planning.....	7-69
APS Process.....	7-71
Measuring Master Scheduling Performance.....	7-73
Policies and Methods	7-73
Problem Indicators.....	7-75
Performance Measures.....	7-77

Session 8—Case Studies

Case Studies	8-7
Production Planning Methods.....	8-7
Master Scheduling in a Make-to-Order Environment	8-13
Master Scheduling in a Make-to-Stock Environment	8-19

Appendix

Progress Check Answer Sheet	A-1
Bibliography	A-2
