Table of Contents

Session 1—Introduction to Supply Chain Management

Introduction to Manufacturing	1-9
Role of Manufacturing.....	1-9
Global Citizenship.....	1-11
Manufacturing Business Model.....	1-15
Business Environment	1-23
Manufacturing Environment and Process Choices	1-27
Manufacturing Environments	1-27
Product Life Cycle and Manufacturing Environments.....	1-33
Choice of Processes and Layouts.....	1-35
The Manufacturing Supply Chain	1-45
The Supply Chain Concept.....	1-45
Views of the Supply Chain.....	1-47
Supply Chain Organizational Issues	1-51
Performance Measures.....	1-53
Role of Materials Management.....	1-55
Manufacturing Planning and Control	1-57
Objectives of Manufacturing.....	1-57
Priority and Capacity Planning.....	1-57
Manufacturing Planning and Control Hierarchy	1-59
From MRP TO ERP	1-61
From MRP to ERP	1-61
From MRP to MRP II	1-61
From MRP II to ERP	1-63
Impact of New Systems and Philosophies	1-65

Session 2—Demand Management

Demand Management Processes	2-7
Marketing Management	2-7
Customer Relationship Management.....	2-11
Demand Planning	2-11
Characteristics of Demand	2-13
Independent Versus Dependent Demand.....	2-13
Sources of Demand	2-13
Demand Patterns and Stability	2-15
Forecasting	2-19
Purposes and Uses of the Forecast.....	2-19
Principles of Forecasting	2-21
Data Collection and Preparation Principles	2-23
Forecasting Techniques.....	2-25
Qualitative Techniques	2-25
Quantitative Techniques: Extrinsic.....	2-25
Quantitative Techniques: Intrinsic	2-27
Moving Average Forecast	2-27
Exponential Smoothing.....	2-35
Seasonal Forecast	2-39
Tracking the Forecast	2-43
Bias	2-43
Random Variation (Error).....	2-43
Measuring Forecast Error.....	2-45

Session 3—Master Planning

Purpose and Scope of Master Planning	3-7
Priority Planning.....	3-7
Planning Horizon and Level of Detail	3-7
S&OP and Production Planning.....	3-9
Sales and Operations Planning	3-9
Production Planning	3-11
Master Scheduling and Master Production Schedule.....	3-37
Purpose	3-37
Objectives	3-37
Inputs	3-39
Relationship to the Production Plan.....	3-39
Developing a Master Schedule.....	3-41
Projected Available Balance	3-41
Preliminary MPS	3-43
Planning Horizon	3-47
Time Fences and Zones	3-49
Aggregating the Master Schedules	3-49
Rough-Cut Capacity Planning	3-51
Resolving Differences and Publishing the MPS	3-51
Master Scheduling and Sales	3-53
MPS and Delivery Promises.....	3-53

Session 4—Material Requirements Planning (MRP)

Material Requirements Planning Environment	4-7
Nature of Demand	4-7
Linkages with Other Manufacturing Planning and Control Functions	4-7
Objectives of MRP	4-9
MRP Process Inputs and Outputs	4-11
Planning Software	4-13
Bill of Material	4-15
Introduction	4-15
Summarized Bill of Material and the Indented Bill	4-15
Single-Level Bill of Material	4-17
Multilevel Bill of Material	4-17
Parent-Component Relationship	4-17
Bill of Material: Summary	4-19
Planning Bill	4-23
Where-Used and Pegging Data	4-25
Uses of the Bill of Material	4-27
Material Requirements Planning Logic.....	4-29
Approach to this Section	4-29
MRP Logic Overview.....	4-29
Lead-Time Offsetting and Exploding	4-31
Gross and Net Requirements.....	4-37
Basic MRP Record	4-41
Capacity Requirements Planning.....	4-47
Using and Managing the Priority Plan	4-49
Role of MRP Software	4-49
Order Control	4-51
Releasing Planned Orders	4-53
Maintaining Priorities and Replanning	4-55

Session 5—Capacity Management and Production Activity Control

Introduction	5-7
Manufacturing Planning and Control Hierarchy,	5-7
Transition from MRP to CRP and PAC	5-7
Capacity Management	5-9
Phases of Capacity Management.....	5-9
Definition of Capacity	5-11
Capacity Planning Process.....	5-11
Determining Capacity Available.....	5-13
Rated Capacity.....	5-21
Demonstrated Capacity	5-25
Capacity Requirements Planning.....	5-27
Introduction.....	5-27
Key Inputs	5-27
CRP Process.....	5-33
Production Activity Control	5-41
Objectives	5-41
Functions	5-43
Information Requirements.....	5-45
Data Requirements	5-47
Scheduling.....	5-49
Introduction.....	5-49
Scheduling and Loading Techniques	5-49
Bottleneck Scheduling	5-53
Implementation	5-55
Shop Order Packet	5-55
Order Release Process.....	5-55
Control.....	5-57
Goals, Objectives, and Control Levers	5-57
Priority Control	5-59
Input/Output Control.....	5-61
Flow Control	5-67

Session 6—Aggregate Inventory Management

Introduction to Inventory	6-7
What is Inventory?	6-7
Aggregate and Item Inventory Management.....	6-9
Aggregate Inventory Management	6-11
Inventory and the Flow of Materials	6-11
Reasons for Carrying Inventory	6-13
Functions of Inventory	6-15
Inventory Objectives.....	6-17
Inventory Costs	6-21
Item Costs	6-21
Carrying Costs	6-23
Ordering Costs.....	6-25
Stockout Costs	6-29
Capacity-Related Costs.....	6-29
Financial Statements and Inventory	6-33
Balance Sheet and Income Statement Accounts	6-33
Balance Sheet.....	6-35
Income Statement	6-37
Aggregate Inventory Management and Financial Statements.....	6-39
Cash Flow Analysis.....	6-43
Inventory Valuation	6-45
Financial Inventory Performance Measures	6-47

Session 7—Item Inventory Management

Order Quantities	7-7
How Much to Order.....	7-7
Lot-Size Decision Rules.....	7-9
Economic Order Quantity (EOQ).....	7-13
Economic Order Quantity Formula	7-21
Validity of EOQ Assumptions.....	7-25
Independent Demand Ordering Systems	7-27
Order Point System.....	7-29
Safety Stock.....	7-35
Determining When the Order Point is Reached.....	7-43
Periodic Review System	7-47
ABC Inventory Control	7-55
ABC Principles.....	7-55
ABC Classification.....	7-57
ABC Process.....	7-57
Sample Calculation	7-59
Control Based on ABC Classification.....	7-63
Auditing Inventory Records	7-65
Periodic Inventory Audit	7-65
Cycle Counting.....	7-67

Session 8—Purchasing and Physical Distribution

Purchasing	8-7
Types of Purchased Items	8-7
Purchasing Objectives	8-9
Purchasing Activities and Participants	8-11
Purchasing Activities.....	8-11
Physical Distribution	8-29
Scope and Value	8-29
Global Distribution	8-29
Influence of Marketing.....	8-31
Interface with Production and Finance.....	8-33
Other Factors: Distribution Channels ..	8-37
Scope of Physical Distribution Factors	8-37
Distribution Inventory	8-39
Purpose of Distribution Inventory	8-39
Objectives	8-41
Distribution Inventory Planning Systems.....	8-43
Push System.....	8-45
Distribution Requirements Planning (DRP)	8-45
Transportation	8-49
Introduction	8-49
Reverse Logistics	8-55
Basic Transportation Modes	8-55
Costs of Moving Goods	8-65
Warehousing	8-71
Purpose of Warehousing	8-71
Warehousing Process and Activities.....	8-71
Stock Location Systems	8-73
Public Versus Private Warehousing	8-75

Session 9—Lean and Quality Systems

Product and Quality Systems	9-7
Product and Quality Cycle	9-7
Objectives.....	9-7
Systems and Methodologies.....	9-9
Principles, Practices, and Tools.....	9-11
Focus on the Customer.....	9-13
Value of a Product to the Customer	9-15
Quality Functional Deployment.....	9-15
Lean	9-17
House of Toyota	9-17
Why Implement Lean?.....	9-17
Waste	9-19
Continuous Flow Production	9-21
Pull Systems.....	9-21
Work Layouts	9-23
Process Flexibility	9-25
Total Productive Maintenance.....	9-27
Process and Continuous Improvement.....	9-29
Employee Involvement and Empowerment	9-31
Lean Tools and Techniques	9-33
Supplier Partnerships.....	9-35
Total Quality Management.....	9-37
Product Quality	9-37
Quality-Related Costs	9-41
Quality Control Tools.....	9-43
Six Sigma.....	9-57
Summary	9-63

Session 10—Theory of Constraints

Introduction to Theory of Constraints	10-7
Philosophy and Basic Principles	10-7
Types of Constraints	10-9
Problem-Solving Tools	10-9
General Applications	10-11
VATI Analysis.....	10-11
Drum-Buffer-Rope Planning and Scheduling	10-13
Simplified Drum-Buffer-Rope (S-DBR)	10-27
Throughput Accounting.....	10-29
Critical-Chain Method	10-31
Distribution.....	10-33

Appendix

Progress Check Answer Sheet.	A-1
Bibliography	A-2

Index

Index.....	Index 1
