Brief Table of Contents

Session 1	Operations Management Foundations
Session 2	Introduction to Distribution and Logistics
Session 3	Channel Network Design
Session 4	Inventory Management
Session 5	Distribution Requirements Planning (DRP)
Session 6	Mid-Term Examination
Session 7	Warehouse Management
Session 8	Packaging and Materials Handling
Session 9	Transportation Management
Session 10	Transportation Operations
Session 11	Final Exam

Table of Contents

Session 1: Operations Management Foundations

Principles of Operations Management – Program Overview	1-3
Principles of Distribution and Logistics – Course Overview	1-5
Operations Management Foundations – Session Overview	1-7
Session Learning Objectives	1-9
What is Operations Management?	1-11
Why Study Operations Management?	1-13
What Business Trends are Impacting Operations Management?	1-15
What Do Operations Managers Do?	1-23
Career Opportunities in Operations Management.....	1-25
What Value-Added Activities are Performed?.....	1-27
How does Operations Management Fit into the Organization?	1-29
What is the Scope of Operations Management Functions?.....	1-33
Operations Management – Changing Perspectives	1-39
Operations Management and Business Strategy	1-41
Contributing Role of Operations Management to Strategy	1-43
Ten Strategic Operations Management Decisions	1-45
Distribution and Logistics Concepts Self-Assessment.....	1-49
Distribution and Logistics Terms Matching Exercise	1-51
Bill of Distribution Exercise.....	1-53
Distribution and Logistics Organizational Structure Exercise	1-55
Review, Terms, Discussion Questions, Exercises	1-57
Terms Check.....	1-59
Performance Check – Answers and Test Documents	1-64
Discussion Questions	1-67
Suggested Additional Readings	1-71

Session 2: Introduction to Distribution and Logistics

Introduction to Distribution and Logistics Overview.....	2-3
Session Learning Objectives.....	2-5
Defining Distribution Management	2-7
What is the Supply and Distribution Channel?	2-9
The Need for Distribution Channels	2-11
Reducing Channel Transaction Complexity	2-13
Channel Intermediaries.....	2-17
Role of the Distribution Function.....	2-21
Defining Logistics Management	2-27
Logistics Management Functions	2-29
Logistics Operations	2-31
Reverse Logistics and Motivating Factors	2-33
Reverse Logistics Hierarchy and Benefits	2-35
Logistics Strategy	2-37
Guidelines for Logistics Strategy	2-39
Logistics and Supply Chain Management.....	2-41
Review, Terms, Discussion Questions, Exercises.....	2-43
Terms Check	2-45
Performance Check – Answers and Test Documents.....	2-49
Discussion Questions.....	2-53
Case Study	2-57
Suggested Additional Readings.....	2-61

Session 3: Channel Network Design

Channel Network Design Overview	3-3
Session Learning Objectives	3-5
Channel Network Design Fundamentals.....	3-7
Reasons for Supply and Distribution Channels	3-9
Critical Design Considerations	3-13
Channel Design Factors	3-15
Level of Channel Dependency	3-17
Channel Design – Manufacturing Method	3-19
Channel Configuration Attribute Matrix	3-21
Producer Storage with Direct Delivery	3-27
Producer Storage with Drop Ship.....	3-29
Producer with Extended Channel Network.....	3-31
Aggregator with Extended Channel Network.....	3-33
Aggregator with e-Business Network.....	3-35
Framework for Channel Network Design.....	3-39
Micro Decisions Influencing Channel Design.....	3-41
Factor-Rating Method	3-43
Center of Gravity Method	3-45
Channel Demand and Capacity	3-47
Review, Terms, Discussion Questions, Exercises	3-49
Terms Check.....	3-51
Performance Check – Answers and Test Documents	3-56
Discussion Questions	3-59
Case Study.....	3-63
Suggested Additional Readings	3-67

Session 4: Inventory Management

Inventory Management Overview	4-3
Session Learning Objectives.....	4-5
Inventory Definitions	4-7
Functions of inventory.....	4-9
Strategic Inventory Management Process	4-11
Characteristics of inventory in the Distribution Channel	4-13
Channel Inventory and Demand Flows	4-15
Inventory Replenishment Components.....	4-17
Ordering Techniques – When to Order	4-19
Order Point – Basic Model and Order Point Trigger	4-21
Order Point – Potential of Demand Variation and Safety Stock.....	4-23
Calculating the Safety Stock.....	4-25
Determining the Order Quantity	4-31
Order and Inventory Carrying Cost Components	4-33
Determining the Optimal Order Quantity	4-35
EOQ Calculation.....	4-37
Maximum and Minimum Ordering.....	4-39
Replenishment Planning Process.....	4-41
Review, Terms, Discussion Questions, Exercises.....	4-43
Terms Check	4-45
Performance Check – Answers and Test Documents.....	4-49
Discussion Questions.....	4-53
Case Study	4-57
Suggested Additional Readings.....	4-65

Session 5: Distribution Requirements Planning (DRP)

Distribution Requirements Planning (DRP) Overview	5-3
Session Learning Objectives	5-5
Distribution Channel Dependencies	5-7
“Push” System Functions	5-9
“Push” System Allocation – Example	5-11
“Pull” System Functions	5-13
What to Choose: Order Points or DRP	5-15
Defining Distribution Requirements Planning (DRP)	5-17
Time Phasing – The Heart of DRP.....	5-19
Introduction to the DRP Grid	5-21
PAB and the DRP Grid.....	5-23
Net Requirements and the DRP Grid.....	5-25
DRP Planned Order Generation	5-27
PAB and Net Requirements Recalculation	5-29
DRP Grid Exercise	5-31
DRP and the Bill of Distribution	5-33
DRP Planning Process	5-35
DRP Example.....	5-37
Review, Terms, Discussion Questions, Exercises	5-39
Terms Check.....	5-41
Performance Check – Answers and Test Documents	5-45
Discussion Questions	5-49
Case Study.....	5-53
Suggested Additional Readings	5-57

Session 6: Mid-Term Exam

Session 7: Warehouse Management

Warehouse Management Overview	7-3
Session Learning Objectives.....	7-5
Defining Warehouse Management	7-7
Warehouse Functions – Materials Handling	7-9
Product Storage.....	7-11
Order Management	7-13
Information Transfer	7-15
Types of Warehousing.....	7-17
Basic Operations of Warehousing.....	7-25
Strategic Decision Components	7-27
Use of Third-Party Logistics (3PL.....	7-29
Warehouse Management Process	7-31
Importance of Warehouse Standards.....	7-33
Receiving Flow	7-37
Warehouse Stocking Functions.....	7-39
Three P’s of inventory Control.....	7-37
Transaction Management.....	7-43
Order Picking Options.....	7-45
Order Shipment Flow.....	7-47
Warehouse Performance	7-49
Review, Terms, Discussion Questions, Exercises.....	7-51
Terms Check	7-53
Performance Check – Answers and Test Documents.....	7-58
Discussion Questions.....	7-61
Case Study	7-65
Suggested Additional Readings.....	7-69

Session 8: Packaging and Materials Handling

Packaging and Materials Handling Overview.....	8-3
Session Learning Objectives	8-5
Warehouse Design and Layout Objectives.....	8-7
Warehouse Size and Capacity.....	8-9
Basic Warehouse Layouts	8-11
Warehouse Layout Development.....	8-13
Warehouse Design and Layout Principles.....	8-15
Principles of Materials Handling	8-17
Types of Storage Systems	8-19
Large-Item or Large-Volume Storage	8-21
Small-Item or Low-Volume Product Storage.....	8-25
Automated Storage Systems.....	8-27
Stocking Inventory in Warehouse Locations	8-33
Dock Equipment.....	8-37
Mobile Materials Handling Equipment	8-41
Role of Packaging	8-47
Unitization.....	8-49
Unitization Principles and Examples.....	8-51
Warehouse Automation – Key Drivers.....	8-53
Warehouse Automation Components.....	8-55
Warehouse Management System (WMS).....	8-57
Review, Terms, Discussion Questions, Exercises	8-59
Terms Check.....	8-61
Performance Check – Answers and Test Documents	8-66
Discussion Questions	8-69
Case Study.....	8-73
Suggested Additional Readings	8-77

Session 9: Transportation Management

Transportation Management Overview	9-3
Session Learning Objectives	9-5
Defining Transportation Management	9-7
Fundamental Principles of Transportation	9-9
Principles of Transportation Operations	9-11
Transportation Participants	9-17
Transportation Services – Load Transport	9-19
Transportation Services – Product Storage	9-21
Relationship of Transportation to Other Business Functions	9-23
Modes of Transportation	9-27
Types of Transportation Carriers	9-41
Third-Party Logistics (3PL) – Functions and Transportation	9-45
Logistics Outsourcing Models	9-47
Transportation Challenges	9-49
Review, Terms, Discussion Questions, Exercises	9-51
Terms Check	9-53
Performance Check – Answers and Test Documents	9-58
Discussion Questions	9-61
Case Study	9-65
Suggested Additional Readings	9-69

Session 10: Transportation Operations

Transportation Operations Overview.....	10-3
Session Learning Objectives.....	10-5
Transportation Operations Principles.....	10-7
Role of Transportation Administration	10-9
Types of Transportation Risk	10-11
Transportation Management Process.....	10-13
Transportation Cost.....	10-15
Detailed Transportation Cost Components	10-19
Transportation Rates and Pricing.....	10-23
Terms of Sale.....	10-25
Transportation Mode Selection	10-27
Transportation Carrier Selection	10-31
Transportation Routing and Scheduling	10-33
Documentation and Post-Shipment Processing.....	10-39
Transportation Performance Measurement	10-41
Transportation Performance Scorecard.....	10-43
Transportation Management System.....	10-45
Review, Terms, Discussion Questions, Exercises.....	10-47
Terms Check	10-49
Performance Check – Answers and Test Documents.....	10-54
Discussion Questions.....	10-57
Case Study	10-61
Suggested Additional Readings.....	10-65

Session 11: Final Exam
